

Watershed Restoration through Landowner Stewardship

Nashwaak Watershed Association Inc.

\$15,000 Grant

This project improved the environment and built a stronger Landowner Conservation Program, inspiring community members to be stewards of their own shorelines.

Project Achievements:

- 11 landowners in the Nashwaak watershed completed native species plantings.
- 672 native floodplain trees were planted.
- 1,968 shoreline willows were planted.

Hen House Installations and Restoration of Wood Duck Habitat on Private Lands in Southern New Brunswick

SNB Wood Co-operative Ltd.

\$10,000 Grant

The purpose of this project was to improve the quality and quantity of productive duck nesting sites (and reduce predation) on private lands throughout southern New Brunswick.

Project Achievements:

- Produced and installed 50 hen houses and 50 wood duck boxes.
- Engaged 30 private landowners in hen house installations and 25 private landowners in Wood duck habitat restoration.
- Educated landowners and the community on the benefits of hen houses.
- Planted 1000 red, white, and bur oak trees.
