

## Introduction to Waterfowl Hunting Activities—2018

Héritage faune  
**\$15,000 Grant**

This project allowed hunting associations and waterfowl groups to develop and enhance waterfowl hunting activities with the next generation, while raising participants' awareness of the importance of wetland habitat.

### Project Achievements:

- Participants completed a hunter safety and wildlife conservation course.
- Participants observed waterfowl and its habitat.
- Participants were introduced to waterfowl hunting with qualified mentors and took part in game tasting.

## Conservation of the St. Lawrence Coastal Habitats

Nature Conservancy of Canada-Quebec  
**\$25,000 Grant**

Through stewardship and awareness activities, this project has helped to promote the conservation of coastal habitats by involving private landowners, local partners, volunteers, hunters, and other land users in concrete actions aimed short-term results for the protection of their environment.

### Project Achievements:

- Meetings and discussions with 23 owners for the legal protection of more than 400 hectares of wetlands and coastal areas.
- Monitored the ecological integrity of more than 200 hectares of protected wetlands and coastal areas.
- Developed 6 public awareness tools on the importance of coastal habitats and the protection of associated species.

## Waterfowl Hunting Exhibit

Organisme des bassins versants de la Haute-Côte-Nord (OBVHCN)

**\$3,510 Grant**

This project involved holding an event that promoted waterfowl hunting on the territory of Haute-Côte-Nord, to raise participants' awareness and respect of the environment. Kiosks, workshops, and lectures were offered to visitors.

### Project Achievements:

- Provided new hunters with information on the basics of hunting and the necessary equipment.
- Trained participants to identify ducks present in Haute-Côte-Nord and informed them about nesting and wintering areas.
- Educated participants about the rules and regulations of waterfowl hunting.

## Restoration of Segment 2 of the Saint-Barthélemy Wildlife Management

Ducks Unlimited Canada

**\$50,000 Grant**

Ducks Unlimited Canada and its partners came to the rescue of Lake Saint-Pierre. Segment 3 has undergone a variety of restoration efforts since 2015 that will provide optimal conditions for waterfowl and yellow perch.

### Project Achievements:

- Improved access to water and fish associated with the site.
- Reduced sediment discharge to streams.
- Optimized habitat for wildlife.

## Protecting and Enhancing the Biodiversity of Forested Wetlands on Private Lands EHJV, Southern Quebec, 2018-2019

Fondation de la faune du Québec

**\$80,000 Grant**

This project promoted the private stewardship of several wetlands of interest to waterfowl in southern Quebec.

### Project Achievements:

- 80 sites of interest have been retained on a voluntary basis.
- 1280 hectares of wetlands were protected.
- 120 landowners committed to preserving their wetlands.
